

CASE NAME: ~~CROSSED TRACKS!~~

The first step in this puzzle is to solve all of the clues. Two pieces of information assist with this (though they may not be immediately obvious). First, the clues are in alphabetical order by answer. Second, the length of each answer is equal to the number of triangles in the tile accompanying each corresponding clue. The clues and answers are:

Once all or most of the clues are solved their answers can be written on the answer tiles. Answers are written from left to right, on top of the triangle groupings, one letter per triangle. The answer tiles are now pieces of a puzzle which you must put together. Once assembled, the following figure is formed:

The answer, therefore, is JUNCTION.
