

CASE NAME: STAR CHART
ATTENDING OFFICER(S): JENNIFER CHALFAN
LOS ANGELES POLICE DEPARTMENT
CRIME LOCATION: GRIFFITH OBSERVATORY

SOLVED!

Answer: MARS ATTACKS

The puzzle is a large page full of stars, each with the photo of an actor in the center. The stars are grouped into constellations corresponding to horoscope signs.

A version of this page with the actors and horoscope signs labeled is named **Star Chart_Answers.png**.

Each constellation contains actors that are associated with a particular movie. For each constellation, only one actor has a birthday corresponding to the constellation their picture is placed in.

The Excel file **Star Chart_details.xlsx** lists each movie associated with each constellation, the actors contained in that constellation, their birthdays, and their signs.

Once the solver identifies the one actor per movie whose sign is that of the constellation their picture is placed in, they have the following list:

Actor	Birthday	Sign
Jack Nicholson	4/22/1937	Taurus
Martin Short	3/26/1960	Aries
Natalie Portman	6/9/1981	Gemini
Glenn Close	3/19/1947	Pisces
Jack Black	8/28/1969	Virgo
Jim Brown	2/17/1936	Aquarius

These actors all appeared in *Mars Attacks*, which is the final answer.
